

Dear Fellow Citizens

The National Broadcast by our Hon Prime Minister has asked from us two very doable and lifelong values of “resolve and self discipline”- which we should anyhow inculcate, facing any crisis, leave aside the present Pandemic of Corona Virus.

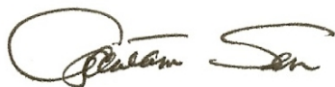

For us at Healthspring, this is a special responsibility to help you coming out of this crisis with flying colours and victorious. Throughout the centuries healthcare professionals ignoring personal risks have reached out to the communities across the world and helped to eradicate similar dangerous pandemics like Small Pox Plague Polio and in more recent times like HIV SARS, Swine Flu MERS

Being at the frontline of care with **Prevention** as our principle focus, we will be with you all throughout this crisis and will not abandon you at any stage as we follow our two other core values such as **person – centred care** and **longitudinal care** to make sure that you receive the **Right care** at **Right time** and at **Right level of care**.

Our Doctors and their team of healthcare professionals and the team of managers at the HO and our call centres are all geared up to meet any crisis in the surrounding community and beyond.

Remember, “Be Prepared” is the best way to tackle any emergency. Resolve and Self Discipline to acquire and stick to best lifestyle behaviour is the key to good health.

“We shall overcome”.
